The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-24 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1's "obtainable" is indefinite. Must D be "obtained" from the two silanes or is the claim language merely a suggested possibility?

Claim 4,5,12,19's "in particular" is confusing. Are these claim limitations or not?

Claim 10's "which can be" is confusing. Is this a claim limitation or not?

Claim 11,14,15,20,21 and 24's "especially" is confusing. Are these claim limitations or not?

Claim 14,15 and 19's "preferably" is confusing. Are these claim limitations or not?

Claim 18's acetates and diethylmalonate are esters – not the ketones or acids required by claim 17.

Claim 22 provides for the use of the composition, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 22 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex*

*parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Schwindt '833 and Izumo '725 both disclose compositions that include polyurethane prepolymer, aliphatic isocyanate and aromatic isocyanate. However, these references lack applicant's component (D). Hsieh '317 (abstract) shows applicant's (D) but not mixed with urethane prepolymer. An isocyanate functional prepolymer (col 5 line 46) can be superimposed on (D), but this does not suggest a mixture. Furthermore, applicant (PR8 vs PR4) has shown the inclusion of (D) permits long waiting times.
